Summary

Aspiring Full-Stack Developer and Cybersecurity Enthusiast with strong foundations in Java, Python, and AI-based systems. Experienced in building real-world applications including AI tools, secure systems, and automation solutions. Skilled in modern development workflows using VS Code and AI-assisted development techniques. Currently strengthening problem-solving skills through Data Structures and Algorithms (Java).

Skills

Programming: Java, Python

Web Development: HTML

Tools & Technologies: Git, GitHub, OpenCV, VS Code

Concepts: OOP, Data Structures & Algorithms (Java - Ongoing), Basic Machine Learning

Other Skills: Team Management, Mentoring, Consultancy, Problem Solving

Experience

Team Leader & Technical Head – Smart India Hackathon (SIH) 2025

2025

Campus Round Winner

- Led a team of 6 members in Smart India Hackathon (SIH) 2025.
- Secured 23rd rank among 600+ teams and won the campus round.
- Directed system design, development, and problem-solving strategy.
- Managed team coordination and ensured timely delivery under pressure.

Projects

JobSync – AI-Based Job Matching Platform | AI, NLP

- Developed an AI-powered job matching platform using NLP to analyze resumes and job descriptions.
- Implemented intelligent matching algorithms for personalized job recommendations.
- Utilized AI-assisted development techniques to accelerate prototyping and problem-solving.

HealthZen – AI Wellness Assistant | AI, Python

- Built an AI-based assistant providing personalized health and lifestyle suggestions.
- Analyzed user input to recommend diet, fitness, and daily habits.
- Focused on user-centric design and usability improvements.

HTP – Virtual Identity System | Security

- Developed a privacy-focused virtual identity system using temporary credentials.
- Enhanced digital privacy and secure authentication mechanisms.
- Explored real-world applications of identity protection systems.

QR Attendance System with Continuous Refresh | Python

- Built a QR-based attendance system with dynamically refreshing QR codes.
- Prevented proxy attendance using real-time QR updates.
- Improved reliability and security of attendance tracking systems.

Awards & Certifications

- Generative AI: Boost Your Cybersecurity Career – IBM (94%)
- Google Cloud Skill Badges: Data Loss Prevention, Cloud Storage
- Gemini Certified Student – Google for Education

Education

B.Tech Computer Science Engineering

2024 – 2028

Bennett University, Greater Noida
